BATTERY PACK

- An additional power source removes the need to connect wires from the lift to the vehicle battery, reducing installation time, cost, and complexity
- 12-volt power supply add-on which uses any standard outlet to recharge. Charges last about 150 cycles*
- By using the battery pack option, lifts are easily moved from one vehicle to another

*Tested under ideal conditions using 325 lb. Scooter. Cycles per charge may vary depending on various factors such as scooter or power chair weight and climate.

MULTI-PURPOSE BATTERY PACK

- Industry first
- Industry exclusive
- Charges the mobility device from the lift as you drive

Interior Lifts

Pride® Lifts

MOBILITY MADE EASY.

Backpacker® SERIES

Backpacker® Interior Lifts are specifically engineered for scooter and power chair transportation, while providing concealment and weather protection for your mobility product. The low-profile, one-piece design, allows for easy loading and unloading of your mobility product – simply drive on and off the all-steel constructed platform. Features include a durable 12-volt motor with easy-to-use two button hand control for simple and reliable operation. Most applications do not require drilling or vehicle modification and include a quick install kit of ease of installation.

Backpacker® PLUS

- Engineered for the transportation of scooter and power chairs in minivans and full size vans.
- Large 43" usable platform length and 27" product width to accommodate larger mobility devices.
- Most applications do not require the removal of the 2nd row seating.

Backpacker® AVP

- Engineered for the transportation of scooter and power chairs in SUVs and CUVs.
- Provides up to 37" of travel distance from the vehicle by way of three separate actuators and motors – each with its own manual override.
- Compatible with SUVs/CUVs that are 31" height.
- Features a unique adjustable platform accommodates smaller SUVs/CUVs.
