Graduated Compression Socks and
Hosiery for Venolymphatic Disorders

5 reasons patients love Sigvaris products

- 1. Great Fit:** Our Precise Fit Sizing sizing system was designed to fit the broadest range of patients, providing accurate compression and exceptional comfort.
- 2. Easy to Put On:** Sigvaris Medical hosiery glides on easier than other compression brands because we use double-covered spandex inlay yarns.
- 3. Easy to Launder:** Products are machine washable and machine dryable. No need to air dry!
- 4. Six Month Guarantee:** SIGVARIS GROUP guarantees the compression of our circular knit products for six months, even when machine washed and dried.
- 5. Color and Material Choices:** More choices of colors, patterns and even premium natural fibers like Sea Island Cotton, Linen, and Merino Wool than any other medical compression brand.

With an expansive set of inclusive sizes, a dazzling choice of fabric colors and patterns, and a wide selection of skin tones for our women's Style products, Sigvaris fits you and your customers' shape, style, and shade. We are dedicated to making products that can help improve circulation, increase energy, and aid in keeping legs healthy.¹

In other words, ***Sigvaris Fits You!***

Established in 1864, SIGVARIS GROUP is, and has always been, a family-owned company. Founded and headquartered in Switzerland, our passion for helping people feel their best is why we've been a global market leader over 160 years and counting.

Our products improve, assist, and enhance people's lives.

We are renowned for making exceptional products that combine advanced technology and quality craftsmanship with diverse styles that fit our modern lives.

When heritage, competence, and dedication come together, there's no limit to where we'll go.

Motion

THERMOREGULATING WOOL 422

Motion Thermoregulating Wool combines the benefits of natural Merino wool with cushioned soles, making it ideal for wherever the road takes you!

Compression level

20–30mmHg

Features and benefits

- Merino wool is softer and thinner than regular wool
- Wool fibers naturally help regulate body temperature and transport sweat away from the skin
- Natural properties of wool make these socks odor resistant
- Cushioned, padded soles may prevent blisters

Fiber content

- 67% Fine Merino Wool, 26% Nylon, 7% Spandex
- Non-latex

Best suited for

- Management of mild to moderate stages of Chronic Venous Disease (CVD)
- People who stand on their feet all day
- Work boots, steel-toe shoes, and other occupational footwear
- Adventurers, hikers, campers, craftsman, and gardeners

Motion

FLOW TECH 432

Motion Flow Tech is a fashionable sock that provides all-day support and comfort during any activity.

Compression level

20–30mmHg

Features and benefits

- MeshLink™ channels are designed to deliver optimal airflow to the parts of the foot and leg that generate the most heat, linking the bottom of the foot to the top of the calf and allowing heat to escape
- Cushioned footbed and toe with higher Achilles tendon zones for optimal comfort
- SENSIL® Aquarius fibers keep legs and feet dry with next-generation moisture management
- Smooth, flat toe seam

Fiber content

- 62% Nylon, 24% SENSIL Aquarius Nylon, 14% Spandex
- Non-latex

Best suited for

- Management of mild to moderate stages of Chronic Venous Disease (CVD)
- People who think compression socks make their legs or feet feel hot
- Walking and everyday activities
- Casual, sport, and occupational footwear

Specialty

SECURE 550

Secure combines compression and containment with comfort and durability that's optimal for comfortably managing advanced venous edema, lymphedema, and wound care.

Compression level

20–30mmHg • 30–40mmHg
40–50mmHg

Features and benefits

- More graduated compression and containment than other traditional garments
- Durable, double-covered inlay yarns allow comfortable all-day wear

Fiber content

- 78% Nylon, 22% Spandex (Calf)
- 76% Nylon, 24% Spandex (Thigh)
- Non-latex

Best suited for

- Chronic Venous Insufficiency (CVI)
- Lymphedema that is well-managed
- Lipedema
- Varicosities
- Deep vein thrombosis (DVT)
- Superficial phlebitis
- Post-thrombotic syndrome
- Orthostatic hypotension
- People with sensitivity to latex

DIABETIC COMPRESSION SOCKS 602

Diabetic Compression Socks are the only patented, clinically-proven graduated compression socks constructed for people with diabetes.¹

Compression level

18–25mmHg

Features and benefits

- Padded soles and invisible toe seam add comfort and protection
- Compression-free foot for optimum comfort
- Double-covered inlay yarns provide comfort and allow product to easily glide on and off
- *drirelease*[®] yarns add moisture wicking properties

Fiber content

- 76% *drirelease* (65% Polyester, 11% Cotton), 19% Nylon, 5% Spandex
- Non-latex

Best suited for

- Individuals with diabetes
- Management of mild stages of Chronic Venous Disease (CVD)
- Individuals with peripheral neuropathy
- Patients with an ABI of >0.6

For a PDF of the product ordering form, scan the QR code or visit sigvaris.com/mceforms

*Measure point letter may vary with inelastic garments, please see the 2026 Sigvaris Product Catalog for Inelastic Wraps, Lymphedema Wear, Bandages and Therapy Supplies for a product specific point.

Precise measurements are essential to guarantee the indicated level of compression and to ensure a proper fit. The measuring instructions included in the following pages are designed for your understanding.

The measurement chart and graphic for each product is also included on corresponding product specific order form that can be found online at: sigvaris.com/mceforms

For additional guidance with measuring or fitting of a garment, please contact the Customer Care Solution Center, available Monday–Friday, 8am–7pm at **1.800.322.7744**, ext. 1.

CALF & FOOT

Circumferences:

For Compreflex Calf garments, measure circumferences where indicated on the measurement chart at the largest ankle and largest calf. Measurements may be recorded on the corresponding lines A and C.

For all other Calf garments, measure circumferences where indicated on the measurement chart, beginning with the dot 5cm above the **Lateral Malleolus** (outer ankle bone), continue to the 15cm, 25cm, and 30cm dots. Measurements for the calf may be recorded on the corresponding lines per product for A, B, C, C1 for the left and or right leg.

Length:

Measure length from the **Lateral Malleolus** (outer ankle bone) to lateral aspect of the **Fibular Head**. Measurements may be recorded on the box G.

Foot:

Measure circumference of ankle bend and heel and record on line I. Measure circumference across metatarsal heads and record on line J. Measure length on medial side of foot from heel to 1st metatarsal head and record on line K.

Measurement tips

- 1 When working with a patient tasked with self-measuring, it is best to provide the measuring graphic (included in this guide) as a visual guide. For the best result, limit the use of medical terminology.
- 2 Remind your patient, the tape or measurement tool should be held taut against the skin but should not dent the skin.
- 3 If patient has a caregiver or companion, it may be best to involve them for the placement of the tape or the reading of the measurements.
- 4 Using a body marking pen or makeup pencil may also help with recording landmarks on the limb for future reference.
- 5 Do not mark on fragile or broken skin.

SIGVARIS GROUP is happy to support lymphedema patient access to the compression products they need. In that spirit, we are providing HCPCS codes recommendations for our products and provide PDAC Letters on our website, sigvaris.com. However, please know that we are not reimbursement consultants, and this information is subject to change.

Compreflex Contain

CALF

20–50mmHg

Colors

Black

Beige

When to use

- Patient requires a compressive liner with 10–20mmHg in the foot and ankle
- Ability to wear standard footwear over liner is desired

Ideal for

- Lymphedema
- Edema
- Lipedema

Features and benefits

- Provides **2X more containment** than other Compreflex products to address lower extremity lymphedema
- Garment features a moderately-contoured calf design to fit edematous legs
- 20–50mmHg of adjustable, gradient, inelastic compression
- Stretch panel holds garment in place for easy application and high compliance
- Transition Liners feature an antimicrobial wash for bacteriostatic properties and odor control and an average of 10–20mmHg of compression in the foot and ankle

Billable under
HCPCS code **A6583**

Transition Liner®

10–20mmHg of mild
compression in the
foot and ankle
(see page 55 for details)

Fiber Content

- 48% Cotton • 25% Polyamide • 13% Polyester
9% Polyurethane Foam • 5% Elastane
- Non-latex

Best suited for

- Lymphedema
- Edema

Compreflex Contain material (bottom) provides 2X the containment of Compreflex (top)

Glossary of Terms

Term	Definition	Sigvaris Usage
Chronic Venous Disease (CVD)	A disease state comprised of a wide range of disorders including tired, achy legs, varicose veins, Chronic Venous Insufficiency (CVI), skin issues, and venous leg ulcers (open and healed).	SIGVARIS GROUP manufactures Medical and Well Being products to help with the management of CVD.
Double-Covered Yarn	Spandex fibers are covered twice with yarn to prevent bare spandex from touching the skin for improved wearing comfort.	Used in nearly all SIGVARIS GROUP graduated compression socks and hosiery to create products that are easy to put on and take off, while also providing greater comfort.
Deep Vein Thrombosis (DVT)	A blood clot in a deep vein, most commonly in the lower leg or thigh.	SIGVARIS GROUP cares about DVT prevention. Clinical evidence supports the use of graduated compression to help prevent DVTs.
Graduated Compression v. Anti-Embolism	Graduated compression is for ambulatory patients, whereas anti-embolism stockings are for bedridden patients.	SIGVARIS GROUP offers true graduated compression, meaning products are firmest at the ankle and decrease in pressure going up the leg to help improve circulation.
Hypoallergenic	Designed to minimize the chance of an allergic reaction.	SIGVARIS GROUP offers non-latex products and cotton fabrics for those with sensitive skin and allergies. Also, many SIGVARIS GROUP accessories are designed for consumers with sensitive skin.
ISO Certified	The International Organization for Standardization, a worldwide federation of national standards bodies from over 130 countries. The United States member body is identified as ANSI (American National Standards Institute).	SIGVARIS GROUP follows ISO Standard 13485:2016 for our graduated compression products manufactured in North and South America.
Microfiber	An extremely fine synthetic fiber knitted into textiles with the texture and drape of natural-fiber fabric. This fabric has excellent breathability.	Used to create products with a soft and comfortable feel. Find this fiber in 840 Soft Opaque, 830, 143 & 183 Microfiber Patterns, and 820 Microfiber.
mmHg (Millimeters of Mercury)	Defined as the extra pressure generated by a column of mercury one millimeter high; the same unit of measurement used for blood pressure.	SIGVARIS GROUP products are offered in several ranges of compression levels based on this measurement.
Merino Wool	Merino is the softest and finest wool available in the world and is inherently itch-free.	SIGVARIS GROUP uses this premium wool yarn to create soft products that are thermoregulating for use in all seasons. Used in 422 Thermoregulating Wool, 421 Merino Outdoor Socks, and 152 & 192 All-Season Merino Wool.
Sea Island Cotton	Sea Island Cotton is the rarest cotton in the world and represents the finest in cotton softness.	SIGVARIS GROUP uses the highest-quality yarns in the industry to create products that are best in class. Look for this fine quality cotton in our 220 Sea Island and 151 & 191 Sea Island Cotton Socks.
Sensinnov	A patented SIGVARIS GROUP silicone top band that gently grips the skin and keeps the band in place all day.	This top band is featured in 780 Sheer, 840 Soft Opaque, and 820 Microfiber to help keep thigh stockings in place all day long.
Supima Cotton	Supima accounts for only about three percent of annual cotton production in the United States. Its fineness and longer staple length make it a premium cotton fiber.	SIGVARIS GROUP uses this premium cotton yarn in the 230 Cotton, 220 Sea Island Cotton and 151 & 191 Sea Island Cotton Socks, 146 & 186 Casual Cotton, and 360 Cushioned Cotton products, making them comfortable and ideal for those with sensitive skin.

Symptoms / Indications	Compression Level at the Ankle
<p>Diabetics who experience edema (see Cautions below) and others needing a low compression sock.</p>	<p>8–15mmHg</p>
<p>Management of mild stages of Chronic Venous Disease (CVD): CEAP C0_s (Leg discomfort: Tired, achy legs; Occupational or evening swelling); C1 (Telangiectasias or reticular veins); C2 (Varicose veins). DVT prevention (during pregnancy, travel, post-traumatic and after surgical interventions). Swelling reduction in pregnancy and during travel. After venous interventions. Orthostatic or postural hypotension. Cellulitis or superficial phlebitis.</p>	<p>15–20mmHg</p>
<p>Management of mild stages of Chronic Venous Disease (CVD): CEAP C0_s (Leg discomfort with heavy, tired and achy legs; Occupational or evening swelling); C1 (Telangiectasias or reticular veins); C2 (Varicose veins). Patients with diabetes and mild-to-moderate edema (see Cautions below).</p>	<p>18–25mmHg</p>
<p>Management of mild stages of Chronic Venous Disease (CVD): CEAP C0_s (Leg discomfort: Tired, achy legs; Occupational or evening swelling); C1 (Telangiectasias or reticular veins); C2 (Varicose veins); Management of moderate stages of Chronic Venous Disease (CVD): C3 (Edema); C4^{a,b,c} (Skin changes). DVT prevention and management. Lymphedema maintenance therapy. Mild varicosities with mild to moderate edema during pregnancy. After venous interventions. Orthostatic or postural hypotension. Cellulitis or superficial phlebitis.</p>	<p>20–30mmHg</p>
<p><i>Note: A prescription is recommended for stockings with the indications of 30mmHg or higher</i></p> <p>Management of mild stages of Chronic Venous Disease (CVD): CEAP C0_s (Leg discomfort: Tired, achy legs; Occupational or evening swelling); C1 (Telangiectasias or reticular veins); C2 (Varicose veins). Management of moderate to severe stages of Chronic Venous Disease (CVD): C3 (Edema); C4^{a,b,c} (Skin changes); C5 (skin changes with healed ulceration), C6 (skin changes with active ulcerations). DVT prevention and management. Reduction of post-traumatic and post-surgical edema. Prevention and management of post-thrombotic syndrome. Moderate varicosities with mild to moderate edema during pregnancy. After venous interventions. Lymphedema maintenance therapy. Orthostatic or postural hypotension. Cellulitis or superficial phlebitis.</p>	<p>30–40mmHg</p>
<p>Management of severe stages of Chronic Venous Disease (CVD): C2 (Varicose veins); C3 (Edema); C4^{a,b,c} (Skin changes); C5 (skin changes with healed ulceration), C6 (skin changes with active ulcerations). Severe post-thrombotic syndrome; Lymphedema maintenance therapy.</p>	<p>40mmHg or higher</p>
<p>You should not wear Sigvaris compression stockings if you have any of the following medical conditions: Severe arterial insufficiency, intermittent claudication, ischemia, uncontrolled congestive heart failure, diabetes with advanced arterial compromise, advanced neuropathy with sensory loss in leg or foot.</p>	<p>Contraindications</p>
<p>Skin sensitivities or allergies (including silicone and silver). Neuropathy with decreased sensation in leg or foot. Diabetes with arterial compromise. Confinement to bed or non-ambulatory use unless otherwise prescribed by the physician. Eczema, hypo-dermatitis, dermatosclerosis, dermatitis. Confirmed allergy to compression material.</p>	<p>Cautions</p>
<p><i>No liability accepted for non-observance of contraindications and cautions.</i></p> <p>Rabe E, Földi E, et al. DEALER PORTAL

The SIGVARIS GROUP Dealer Portal is your online location for securely ordering SIGVARIS GROUP products and managing your account. Place and track your orders, review order history, chat with Customer Care, and much more at sigvaris-online.com.

Dealer Portal benefits

- 24/7 access-order any time!
- Sizing Wizard
- Three ways to securely place an order online: Catalog, Quick Entry or Excel Upload
- Access to order history and tracking
- Shipping options including drop ship and easy access to an address table for quick shipment of reorders
- Check your account balance and print invoices
- Credit card payments
- New product launch information
- Current promotions
- Inelastic compression order forms

Email sigvariscares@sigvaris.com and you will receive your active account within one business day!

Measuring Instructions

Please follow these instructions carefully to determine the correct size for different product styles.

Measurements should always be taken in the following order, and as soon after waking as possible when swelling is minimal.

Calf style Open/Closed Toe

- | | |
|---|---|
| 1 | Measure the ankle circumference at the narrowest part of the ankle, above the ankle bone. Use the appropriate series sizing chart to determine if ankle is Small, Medium, Large, or Extra Large.
<i>Note: This should be your first measurement.</i> |
| 2 | Measure the calf circumference at the fullest part of the calf. |
| 3 | Determine the calf length by measuring from the floor up to the fibular head. This measurement is taken on the outside of the leg. |

1 Ankle circumference directly above ankle bone

2 Calf circumference at fullest part of the calf

Pantyhose And Thigh-High style Open/Closed Toe

- | | |
|---|--|
| 1 | Measure the ankle circumference directly above the ankle bone. Use the appropriate series sizing chart to determine if ankle is Small, Medium, Large, or Extra Large.
<i>Note: This should be your first measurement.</i> |
| 2 | Measure the calf circumference at the fullest part of the calf. |
| 3 | Skip Step 3 (but refer to General Guidelines #6 below). |
| 4 | Measure the thigh at its widest circumference. |
| 5 | Determine the leg length by measuring from the floor up to the gluteal fold. |
| 6 | Determine the hip circumference by measuring the widest part of the hips. |

3 Calf length from the floor to the fibular head

4 Widest circumference of the thigh

General guidelines

- | | |
|---|--|
| 1 | Measurements should always be taken as soon after waking as possible, when swelling is minimal. |
| 2 | Measure against bare skin, not over clothing. |
| 3 | The measuring system is based on having the foot flat against the floor and the calf or leg at a right angle to the foot (see images to the right for examples). |
| 4 | Measurements should be taken by pulling the tape around the leg so that it is snug but not constricting. |
| 5 | Length measurements should be taken from the ground up. |
| 6 | Take all measurements, even if the patient only requires calf-length products, as the patient might decide at a later date to purchase additional styles. |

5 Leg length from the floor up to the gluteal fold

6 Circumference at the hip
